

SHIV SANTOSH SARWADE

Software Engineer

Pune, MH +91-7620876612 shiv.s.sarwade@gmail.com Portfolio LinkedIn GitHub

Experience

Software Developer

May 2025 – June 2026

Sitramix, Pune

Node.js, React.js, Next.js, PostgreSQL, MongoDB, Redis, LangChain, OpenAI, Gemini, AWS

- Developed backend services for three production platforms, including an AI-powered design automation platform, Techvruk (engineering community platform), and a multi-tenant CA blogging platform.
- Built AI workflows using LangChain, OpenAI, and Gemini to automate metadata generation, content creation, image generation, OCR processing, resume evaluation, and Retrieval-Augmented Generation (RAG) pipelines.
- Engineered scalable distributed backend architectures using microservices, Redis caching, asynchronous job processing, and database optimization.
- Developed secure REST APIs supporting authentication, payment integration, role-based access control, content management, and business workflows across multiple applications.
- Implemented multi-tenant data isolation and routing to ensure customer-specific experiences across shared infrastructure.
- Deployed and maintained production applications on private Linux servers, AWS, and Vercel, managing releases, environment configuration, and monitoring of application health.
- Collaborated in Agile teams using Jira and Git-based workflows, participated in code reviews, and wrote API documentation to support team-wide development.

Skills

Languages & Core CS: Python, Java, JavaScript (ES6+), SQL, Data Structures & Algorithms, OOP, DBMS, Operating Systems, System Design

Backend Engineering: Node.js, Express.js, REST APIs, JWT Authentication, Refresh Token Rotation, RBAC, Microservices

Frontend Technologies: React.js, Next.js, Redux Toolkit, Tailwind CSS, HTML5, CSS3

Databases & Cloud: PostgreSQL, MongoDB, Redis, AWS (EC2, S3)

AI & Automation: LangChain, OpenAI, Gemini, RAG Pipelines, OCR Workflows

Tools & Methodologies: Git, Linux, Postman, CI/CD, Jira, Agile/Scrum, SDLC, Debugging, Secure Coding Practices

Projects

DesignEra – Production Client Project | Backend Engineer Node.js, FastAPI, Python, Next.js, PostgreSQL, Redis, AWS, OpenAI, GIMP

- Developed a microservice-based backend architecture for a production design asset automation platform.
- Built RESTful APIs for design uploads, asset management, approvals, and progress tracking.
- Engineered Redis-backed distributed image-processing workflows that generated **600+ high-resolution image variants in under 2 minutes**, reducing designers' manual effort by **48%**.
- Integrated OpenAI, GIMP, and AWS S3 to automate design generation, metadata creation, secure asset storage, and export pipelines.
- Implemented Redis caching, database optimization, and scalable media processing to improve application performance and support concurrent user workloads.

Techvruk – Production Community Platform | Backend Engineer Node.js, Next.js, PostgreSQL, Redis, Python, LangChain, OpenAI, AWS

- Developed backend services and REST APIs for a production engineering community platform supporting authentication, communities, blogs, mentorship, events, and content management.
- Built scalable microservice-based backend modules using Node.js, PostgreSQL, Redis, and asynchronous background processing to improve system scalability and maintainability.
- Engineered an AI-powered resume evaluation pipeline using LangChain, OpenAI, and RAG, generating personalized resume feedback in under 6 seconds.
- Implemented secure authentication, JWT, RBAC, and multi-tenant backend architecture while collaborating with a team of three engineers.
- Optimized backend services through Redis caching, asynchronous processing, and PostgreSQL optimization to support 100+ concurrent users.

Awards, Activities & Certifications

- Played a key leadership role in hosting the international contest ICNIO 2024 for Garware College of Commerce.
- Secured 1st Rank in college during Bachelor's degree (BBA-CA) with a CGPA of 9.60/10.
- Completed Infosys Springboard Java Foundation Certification.

Education

Master of Computer Applications (MCA) | SPPU | CGPA: 8.96 / 10

Expected: May 2027

Bachelor of Business Administration in Computer Applications (BBA-CA) | SPPU | CGPA: 9.60 / 10

Graduated: 2025
