

ATHARVA SURAJ SONAWANE

Full Stack Developer

+91-8378040415 atharva.sonwane04@gmail.com Pune Github

Summary

Motivated Full Stack Developer currently pursuing a post-degree in MCA at IMCC. Skilled in front-end technologies like HTML, CSS, JavaScript, React, and back-end development with Node.js, Express, and databases like MySQL and MongoDB. I have hands-on experience with Kotlin and knowledge of Flutter, Golang enabling me to develop seamless mobile applications alongside web platforms. Proficient in Git and eager to apply academic knowledge in realworld projects. Passionate about building responsive, scalable web applications and continuously learning new technologies.

Technical Skills

Frontend Development: HTML, CSS, JavaScript, React.js, Tailwind CSS, Redux, Redux Toolkit, React Router, UI/UX, Vite, CRA, Responsive Web Design, Flutter

Backend Development: Node.js, Express.js, REST API Design (Validation, Pagination, Filtering), JWT Authentication, RBAC, Secure Session Handling, PostgreSQL, MongoDB (Indexing, Query Optimization), Async Processing, Non-blocking I/O

Infrastructure and Tools: AWS (EC2, S3, lambda basics), Git, Linux, Postman, CI/CD basics, Agile (Scrum, Jira)

Experience

Software Developer

May 2025 – December 2025

SITRAMIX, Pune

- Designed and developed 20+ RESTful API endpoints using Node.js and Express with validation, pagination, and structured error handling.
- Implemented JWT-based authentication and RBAC to enforce secure access control across multiple user roles and protected routes.
- Optimized database queries and indexing strategies, reducing API response time by ~20–30% under typical load conditions.
- Handled concurrent requests using async patterns, supporting 100+ requests/minute with non-blocking execution.
- Designed API contracts and response structures to ensure consistency and scalability across services.
- Structured backend architecture for maintainability, including middleware usage, request lifecycle control, and modular routing.
- Deployed and monitored backend services on AWS, contributing to stable production releases.
- Collaborated with frontend systems by designing clean API contracts and consistent response structures.

Projects

MUSEBEAT - MUSIC APP

- Developed MuseBeat, a feature-rich music streaming Android application inspired by Spotify.
- Integrated ExoPlayer for seamless, high-quality audio playback.
- Followed MVVM architecture using ViewModel, LiveData, and Repository for clean code and scalability.
- Designed a modern, user-friendly UI using Material Design principles.

SkillSync

- Built SkillSync, a web-based internship recommendation platform that matches students to relevant opportunities using a skill-based intelligent matching algorithm.
- Designed a verified student profiling system with admin validation to ensure authenticity and improve the quality of internship recommendations.
- Developed a decision-support system for first-time internship seekers, simplifying discovery and reducing mismatched applications through personalized recommendations.

JOBJET

- Developed a full-stack job portal using React.js, Node.js, Express.js, and JWT authentication for secure user sessions.
- Designed a responsive UI with Tailwind CSS and optimized file uploads with Multer.
- Improved page load times by 40% and reduced development time by 50% with the chosen tech stack.
- Enhanced performance by minimizing error rates and speeding up form validation for a smoother user experience.

Education

Masters in Computer Application (MCA)

2025 – 2027

Institute of Management and Career Courses (IMCC) Percentage: 80.96

Bachelor in Business Administration in Computer Application (BBA-CA)

2022 – 2025

M.E.S Garware College of Commerce

Percentage: 85.04%

12th Class Higher Secondary Education (H.S.C)

2021 – 2022

Percentage: 65.33%

10th Class Secondary Education (S.S.C)

2019 – 2020
