

SHIV SANTOSH SARWADE

Software Engineer

Pune, MH +91-7620876612 shiv.s.sarwade@gmail.com Portfolio LinkedIn GitHub

Experience

Software Developer

May 2025 – June 2026

Sitramix, Pune

Node.js, React.js, Next.js, PostgreSQL, MongoDB, Redis, LangChain, OpenAI, Gemini, Docker, AWS

- Developed three production platforms including an AI-powered design generation system, Techvruk (professional networking platform), and a multi-tenant CA blogging platform serving customer-specific subdomains.
- Built AI workflows using LangChain, OpenAI, and Gemini to automate metadata generation, content creation, image generation, OCR processing, resume evaluation, and Retrieval-Augmented Generation (RAG) pipelines.
- Designed scalable backend architectures by introducing microservices, Redis caching, asynchronous job processing, and database optimization to improve application performance and maintainability.
- Developed secure REST APIs supporting authentication, payment integration, role-based access control, content management, and business workflows across multiple applications.
- Implemented multi-tenant data isolation and routing to ensure customer-specific experiences across shared infrastructure.
- Deployed and maintained production applications on private Linux servers, AWS, Vercel, and Docker, managing releases, environment configuration, and monitoring of application health.
- Collaborated in Agile teams using Jira and Git-based workflows, participated in code reviews, and wrote API documentation to support team-wide development.

Skills

Languages & Core CS: JavaScript (ES6+), Python, Java, SQL, Data Structures & Algorithms, OOP, System Design

Backend Engineering: Node.js, Express.js, REST APIs, JWT Authentication, Refresh Token Rotation, RBAC, Microservices

Frontend Technologies: React.js, Next.js, Redux Toolkit, Tailwind CSS, HTML5, CSS3

Databases & Cloud: PostgreSQL, MongoDB, Redis, AWS (EC2, S3)

AI & Automation: LangChain, OpenAI, Gemini, RAG Pipelines, OCR Workflows

Tools & Methodologies: Git, Linux, Docker, Postman, CI/CD, Jira, Agile/Scrum, SDLC, Debugging, Secure Coding Practices

Projects

DesignEra – Production Client Project | Backend Engineer Node.js, FastAPI, Python, Next.js, PostgreSQL, Redis, AWS, OpenAI, GIMP

- Designed and developed a microservice-based backend architecture for a production design asset automation platform, enabling scalable image processing and AI-powered workflow orchestration.
- Built RESTful APIs for design uploads, asset management, variant generation, approvals, and progress tracking using Node.js, FastAPI, and PostgreSQL.
- Engineered distributed asynchronous workflows using Redis-backed background workers to automate image rendering, metadata generation, and AI-assisted processing at scale.
- Integrated OpenAI, GIMP, and AWS S3 to automate design generation, metadata creation, secure asset storage, and export pipelines.
- Implemented Redis caching, database optimization, and scalable media processing to improve application performance and support concurrent user workloads.
- Collaborated with a cross-functional engineering team to deliver a production-ready platform used by client design teams.

Techvruk – Production Community Platform | Backend Engineer Node.js, Next.js, PostgreSQL, Redis, Python, LangChain, OpenAI, AWS

- Developed backend services and REST APIs for a production engineering community platform supporting authentication, communities, blogs, mentorship, events, and content management.
- Designed scalable microservice-based backend modules using Node.js, PostgreSQL, Redis, and asynchronous background processing to improve system scalability and maintainability.
- Built AI-powered resume evaluation and Retrieval-Augmented Generation (RAG) workflows using LangChain, OpenAI, and vector search to deliver personalized resume analysis.
- Implemented secure authentication, JWT, RBAC, and multi-tenant backend architecture while collaborating with a team of three engineers.
- Optimized database queries, Redis caching, and API performance to support concurrent users and production workloads.

Awards, Activities & Certifications

- Played a key leadership role in hosting the international contest ICNIO 2024 for Garware College of Commerce.
- Secured 1st Rank in college during Bachelor's degree (BBA-CA) with a CGPA of 9.60/10.
- Completed Infosys Springboard Java Foundation Certification.

Education

Master of Computer Applications (MCA) | SPPU | CGPA: 8.96 / 10

Expected: May 2027

Bachelor of Business Administration in Computer Applications (BBA-CA) | SPPU | CGPA: 9.60 / 10

Graduated: 2025
