

SHIV SANTOSH SARWADE

Software Developer

+91-7620876612 shiv.s.sarwade@gmail.com linkedin.com/in/shiv-sarwade github.com/ShivSarwade

Summary

Software Developer with hands-on experience building scalable backend systems, optimizing API latency, and designing robust data workflows. Proficient in computer science fundamentals and Data Structures & Algorithms (DSA) in Python. Experienced in writing clean, object-oriented code, designing database schemas, and working under agile environments to solve ambiguous engineering problems. Foundational knowledge of Python and Java, with strong hands-on expertise in Node.js, Express.js, MongoDB, and PostgreSQL.

Skills

Programming Languages: Python (Basic/DSA), Java (Basic), JavaScript (ES6+), SQL
Core CS & Algorithms: Data Structures & Algorithms (DSA) in Python, Object-Oriented Design (OOD), Complexity Analysis (Big-O)
Backend Technologies: Node.js, Express.js, REST APIs, JWT Authentication, RBAC, API Validation, Middleware
Databases & Cloud: PostgreSQL, MongoDB, AWS, Nginx
Tools & Platforms: Git, GitHub, Linux, Docker, Postman
Methodologies: Agile/Scrum, Software Development Life Cycle (SDLC), Code Reviews

Experience

Software Developer May 2025 – Present

Sitramix, Pune

Tools Used: Node.js, Express.js, React.js, Next.js, MongoDB, PostgreSQL, AWS

- Designed and optimized 20+ secure RESTful API endpoints, improving scalability for distributed backend operations.
- Implemented low-latency JWT-based authentication and Role-Based Access Control (RBAC) to secure multi-role workflows.
- Optimized PostgreSQL (indexing) and MongoDB queries, improving execution latency and resource utilization.
- Leveraged React/Next.js and state memoization to reduce unnecessary frontend re-renders by 25–35%.
- Integrated 15+ asynchronous APIs with robust error-handling and fault-tolerant state management.
- Supported AWS deployments and production debugging, ensuring runtime stability and application uptime.
- Collaborated in agile teams to design robust solutions for ambiguous technical requirements.

Projects

Algorithmic Solutions & Data Structures | Python, Git

- Implemented 100+ optimized Data Structures & Algorithms (Trees, Graphs, DP, Search) in Python.
- Analyzed and optimized time and space complexity (Big-O) to ensure maximum execution efficiency.
- Authored clean, object-oriented (OOP) Python code adhering to strict software engineering standards.

Griffion – Security & Authentication Platform | Node.js, React.js, MongoDB

- Developed modular security architecture featuring JWT rotation, refresh tokens, and RBAC.
- Optimized MongoDB schemas to minimize query overhead and improve authorization latency.
- Built robust backend REST APIs and secure frontend workflows with protected routing.

JobJet – Job Portal Platform | Python, React.js, Node.js, MongoDB

- Engineered a Python-based job-matching service with optimized string search and sorting algorithms.
- Designed responsive UI states and structured API payloads using React.js and Tailwind CSS.
- Created backend REST APIs for application tracking, user authentication, and profile management.

Awards & Certifications

- Secured 1st Rank in college during Bachelor’s degree graduation (BBA-CA / BCA) with an outstanding CGPA of 9.60/10.

Education

Master of Computer Applications (MCA) Expected: June 2027

Savitribai Phule Pune University (SPPU)

CGPA: 8.96

Bachelor of Business Administration in Computer Applications (BBA-CA / BCA) Graduated: 2025

Savitribai Phule Pune University (SPPU)

CGPA: 9.60 / 10
